*"Advanced Microbial Technology for Healthy Water,
Healthy Ponds, and Sustainable Aquaculture."*

ADVANCED BIOLOGICAL TECHNOLOGY An advanced blend of beneficial microorganisms formulated to support pond ecology, improve water quality, and maintain a healthy culture environment for shrimp and fish farming.

COMPOSITION

Bacillus subtilis	-	2.0×10^9 CFU
Bacillus licheniformis	-	2.0×10^9 CFU
Bacillus megaterium	-	1.0×10^9 CFU
Bacillus pumilus	-	1.0×10^9 CFU
Nitrosomonas spp.	-	1.0×10^8 CFU
Nitrobacter spp.	-	1.0×10^8 CFU
Enzymes		
Protease	-	50 IU Amylase – 40 IU

KEY FEATURES

- Supports beneficial microbial balance
- Helps reduce organic sludge
- Supports natural nitrification
- Assists in maintaining pond bottom quality
- Helps maintain water clarity
- Supports efficient nutrient cycling
- Designed for regular pond maintenance

RECOMMENDED DOSAGE

Maintenance: 250 g per acre every 7 days
High Organic Load: 500 g per acre every 7 days or
as recommended by an aquaculture consultant.

APPLICATION

Mix the required quantity of the product with clean pond water and jaggery (molasses). Ferment the mixture for 2 hours before application. Apply the fermented solution evenly across the pond during the early morning before 9am.

TECHNICAL INFORMATION

Physical Form	: Free-flowing Powder
Colour	: White
Odour	: Characteristic Fermentation Aroma
Shelf Life	: 24 Months

PRESENTATION

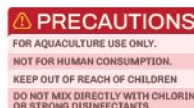

500g HDPE round jar.

CAA CERTIFICATION NO:

CAA/JUNE2026/OTHERS/09853

STORAGE

Store below 30°C in a cool, dry place.
Protect from direct sunlight. Keep container
tightly closed after use. Do not freeze.

Please consult our Technical Expert for accurate dosage application
